-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rackson et al. (US 6,415,270 B1) in view of Ng (US 6,405,175 B1).**

Rackson teaches a system and method comprising: recognizing, across multiple independent electronic marketplaces, credentials of a participant in said on-line transaction (column 9, lines 7-35); validating and recording trade actions of said participant in said on-line transaction for an electronic marketplace independently and transparently (column 9, lines 36-49; column 10, lines 52-57; Figure 14). Rackson does not teach correlating, and analyzing recorded trade actions, and transaction patterns across multiple independent electronic marketplaces to create credibility ratings, whereby said credibility ratings will aid in decision making process by disclosing true intention of participants to make a successful online transaction based on earlier captured trade actions. However, Ng teaches this limitation (column 2, lines 27-30). Therefore it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to incorporate the teachings of Ng into the invention of Rackson. One of ordinary skill in the art would have been motivated to do so in order to provide

other bidders with information about the integrity of the seller. The cited prior art does not teach whereby said credibility ratings will provide uniform ratings by capturing specific set of data across multiple independent exchanges and tracking uniform transaction patterns. However, the Examiner notes that this whereby clause merely states the result of the claim limitations and hence is not accorded patentable weight. A "whereby" clause that merely states the result of the limitations in the claim adds nothing to the patentability or substance of the claim. See *Texas Instruments Inc. v. International Trade Commission*, 26 USPQ2d 1018 (CAFC 1993).
